

Entropy of Search Tactics – Repeated vs Non-repeated Tasks

Transition Entropy

Higher = more randomness in transitions between different tactics

Lower = transitions between tactics are highly predictable

Transition Entropy of Search Tactics – Repeated Task(s)

(a)

Transition Entropy of Search Tactics – Non-repeated Task(s)

(b)

Stationary Entropy

Higher = all tactics are used uniformly

Lower = some tactics are preferred over others

Stationary Entropy of Search Tactics – Repeated Task(s)

(c)

Stationary Entropy of Search Tactics – Non-repeated Task(s)

(d)

Repeated Tasks: Personal Finance

Non-repeated task: Ubuntu Ethics, Algorithmic Bias
